

Sonatex™ Perforated Facings

Acoustic Laminates - Ceiling Panel Designs

asona

Sonatex™ perforated glass mat composite laminates are designed as a decorative finish to Triton glass fibre ceiling panels, Zeus rockwool ceiling panels, Diffusion plasterboard ceiling panels and standard mineral fibre ceiling panels. Sonatex™ perforated laminates can be supplied in popular 'white on white' for a subtle look or in contrasting colours for a dramatic effect. Available in a range of linear, round or non linear designs. Sonatex™ is ideal for general ceilings or as a feature or border finish. Custom designs available to request .

Sonatex™ Perforated Facings

Acoustic Laminates-Ceiling Panel Designs

asona

Sonatex™ is designed to provide a decorative acoustically transparent laminate finish to a broad range of ceiling & wall materials such as polyester, mineral fibre, glass fibre board, rockwool, and plasterboard. Panels can be provided at NRC 0.1 to 1.00 and CAC from 15 to 45dB. Perforation options have a dual layer structure, colours or wood prints can be added for effect but white on white remains the most popular option giving a subtle textural finish to white ceilings.
